Security Solutions

247Secure

" Respond, control and mitigate security risks "

About us

247 Secure is a specialist provider of security management solutions. We deliver and integrate security packages that utilise leading edge technology that are designed to ensure maximum availability and flexibility to meet all your requirements. These are backed up by full service level guarantees.

Investing in a security management solution is essential to safeguard your assets and staff. With so much depending on getting the right system, each installation requires a quality individual approach to provide a suitable solution. Our experience has been gained from working with a range of different sectors, from private, public and education.

With a very active R&D budget and team, the adoption of new technology is quickly and effectively deployed.

247 Secure utilises new technology to deliver quick efficient and practical solutions. An early adopter of wireless communication technology saw us deploy some of the first wire free town centre based CCTV systems.

Traditionally our clients have purchased CCTV systems purely for the purposes of crime prevention and security. However, we believe that by utilising leading edge technology CCTV can be much more than a security system. It can become a dynamic management tool that will provide enormous benefits to management and business owners in such disciplines as compliance, operational procedures and processes and staff training.

Using remote access via broadband, owners and managers can be totally in touch with their organisations without having to physically be on site, irrespective of the size or location.

The need for CCTV

CCTV is considered one of the most effective methods of reducing crime. 247 Secure CCTV security technology can be used in both internal and external settings to watch over and protect people, property, vehicles and valuables. If a crime is committed, CCTV system incident recording can provide valuable evidence, improving the chances of a conviction.

Our security service delivers three key components for a resilient system

- **Business Security audit and planning with implementation and management**

- **Supply, integration and installation of security hardware, software and services**

- **Ongoing management and monitoring of current and future security risks and solutions**

" Safeguard your assets and staff "

Services

Our service listing allows us to satisfy any security requirement and offers maximum performance at all levels. Below is a breakdown of our service and product range.

- CCTV Installations
- IP Security Camera Systems
- CCTV System Upgrades
- Security Camera Maintenance
- Wireless
- Access Control
- Control and manage
- Instant deployment
- Monitoring
- Lone Worker

CCTV Installations
Our installation process is quick and efficient and causes your organisation no disruption or inconvenience.

IP CCTV.
Internet Protocol Closed Circuit Television (IP CCTV) creates digitised video streams you can monitor from anywhere within the reach of your network or view from any remote location via an internet browser. IP CCTV from 247 Secure enables you to take advantage of security solutions and communications from a single point of contact.

CCTV System Upgrades
Some organisations may already have CCTV in place but with our innovative technology and experience within the security field, we guarantee to improve and upgrade your current systems efficiency and reliability.

Security Camera Maintenance
Our maintenance agreement will address any faults and issues, re-focus and clean security cameras, calibrate monitors, test and update recording settings, train your staff and meet all legal requirements of the data protection act. This provides a cost effective solution.

Wireless
Each Wireless CCTV system option is a completely portable, mobile unit that delivers live images directly to a PDA, PC, laptop or DVR via 3G mobile phone technology, broadband and wireless LAN networks, free from most geographical restrictions.

Access control
Electronic access control provides the most efficient and convenient way of securing your building and assets. Access control can also offer flexible control over users' access rights. For example, all staff can gain access through the main door of a building, but access to internal areas may be restricted to those who have a specific need to be there. Access may also be restricted by time, only granting access to particular users at certain times of day or night. Whatever your requirements we can build this into your security plan.

Control and manage
247 Secure systems are put in place to give your organisation piece of mind whilst enabling ease access to your security data and footage when needed with minimal delay.

Instant deployment
247 Secure gives you the ability to have your CCTV system up and running in a very small space of time. If your requirements change for any reason and a wireless system is in place, camera's can repositioned easily to another part of the site straight away.

Monitoring
Remote monitoring of your site and resources enables us to a provide 24-7 security presence even when your away from site. In the event of an incident, an agreed response can be instigated including police, private or staff.

Lone Worker
Lone workers can be exposed to a multitude of risks and hazards through the nature of their job. It is the legal responsibility of employers to ensure the safety of their workforce. This can easily be achieved through 247 Secure's lone worker solution. We help address the issues forced by lone workers and employees at risk with a simple to use, effective solution, that is always there for the worker.

Security Audit

Our starting point is to consider each project as individual and give it the scrutiny and analysis it deserves. After consultation with you about your precise needs, we undertake extensive site surveys and planning strategies for camera locations and suitable technologies.

The 247 Secure team is highly experienced and at the cutting edge of the latest CCTV hardware and software changes which allows us to migrate all systems onto modern platforms.

Existing systems, not installed by 247 Secure can also benefit from our expertise and back-up. If your existing system is not performing to the best of its ability, or requires updating, contact 247 Secure to arrange a site visit.

We will assess the system and suggest any necessary improvements and maintenance options that are appropriate. This assessment will also provide you with the opportunity to experience, first hand, the professionalism and service we provide.

Our security services will give you a response to a huge array of scenarios through three levels of planning:

Deployment: From initial audit to the construction of a security plan for your site, the latest and best technology is always made available to ensure resources, utilities are protected, and solutions cause a minimum of disruption to your daily operation.

Service: The highest level of service and maintenance delivered by our trained engineers ensures a speedy and efficient fix to any problems. Proactive monitoring ensures we are informed and can address any problem sometimes before it arises.

Certification and service levels:
Our services and products follow the latest industry specification and recommendations from planning to installation. Our investment into quality assurance and industry certification affords you the peace of mind required from your security supplier.

Standards

We observe and align our systems and processes with the best practice of both British and international standards: We currently employ:

ISO 9001 Organisational - is suitable for any organisation looking to improve the way it is operated and managed, regardless of size or sector.

BS25999 Business Continuity - provides a basis for understanding, developing and implementing business continuity within your organization and gives you confidence in business-to-business and business-to-customer dealings

ISO 27001 Data security - is the only auditable international standard, which defines the requirements for an Information Security Management System (ISMS). The standard is designed to ensure the selection of adequate and proportionate security controls.

ISO 14001 Environmental - is an international standard that specifies a process for controlling and improving a company's environmental performance.

247 Secure Service Spectrum

For complete peace of mind, in the unlikely event of a system failure, 247 Secure have devised a range of maintenance contracts to meet the individual requirements of our clients. Included in all of our contracts is a preventative maintenance and remote diagnostic service which further reduces the likelihood of a system failure - ensuring that our systems remain as dependable and reliable as when they were first installed.

247 secure maintenance contracts are also extremely flexible, enabling clients to choose a level of service and response time appropriate to their company. Whether a full service level agreement is required, with fully documented response times and replacement stock, or a simple retained services facility. Security technology ranges from the simple to the complex and your system will require the correct level of service and support for each component. 247 Secure will advise you on the most appropriate combinations of service delivery for each part of your system.

Purchase Options

247 Secure offer two purchase options that will hopefully suit every budget and will provide high end CCTV equipment combined with professional support and maintenance.

Capital Purchase - This will include all equipment and full system warranty support and maintenance provided by 247 Secure.

Lease Rental - In addition to capital purchase, we offer the option of renting the system over a specified time ranging from 2-5 years. The rental fee includes all supply and installation of the equipment. Also included is full system warranty support and maintenance for the period of the rental.

What Makes 247 Different?

Delivery mechanisms - we deliver our services through a variety of fast and technologically efficient ways.

Flexibility - we do not make customers fit in a box. All our services can be developed to meet all business requirements.

People - we have a highly trained and experienced security team who understand your customer's needs.

Proactive - we are constantly evolving in this ever-changing market, with a variety of future proofed additions in the pipeline.

Development - New potential risks to businesses are emerging all the time and we have the skills and insight to plan and reduce these risks effectively.

247 Secure offers an innovative and unique range of security products and services aimed at organisations security needs. Our range of solutions ensures delivery of the best security products available combined with the best service.
